-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

1. Claim is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites "...in the trajectory of the entering plug of liquid a distributor body is arranged...", however there is not structural connection between the distributor body and the container.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 6 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. 4,452,233 to **Goodman, Jr. et al.**

The patent to **Goodman, Jr. et al.** discloses a conduit device including a container having a bottom (relative to the direction of fluid flow) and an opposite inlet, which is connected to a duct through which liquid is directed (arrows). Inside the container an inner tube (32) is placed being open towards the bottom, wherein the inner tube separates an inner hollow space from an outer cross-section wise ring

shaped hollow space. Within the body is a distributor body in the form of spiral wires that split and disintegrate the water, and a curved bottom comprising a concavely curved guide surface that diverts the liquid from one of the hollow spaces to the other and reverse the direction of motion of the liquid, as recited in claim 1.

### ***Allowable Subject Matter***

3. Claims 3-5, 7-10 and 13-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
4. Claim 11 is allowed.

### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The recited art is pertinent to Applicant's invention in disclosing coaxial conduits that may reverse the direction of fluid flow.
